

2012 Summer Exchange Program

Program Highlights

Learning

We provide a systematic language and culture curriculum, a wide range of subjects (history, politics, mathematics, geography, etc) for students to choose from and a unique teaching. Most of these classes are participated by both American and Chinese students, which enable maximum cross culture communication.

We also offer a good selection of extra curriculum activities including basketball, football, athletics, piano, chess and book reading. We hope to give Chinese

students a true taste of American school life.

Sightseeing

We take students to the most recognizable and memorable icons of American culture and history, with professional tour guide accompanying the whole way.
